Folding Stereo Headphones

Using Your iHome Headphones

These iHome headphones are designed to be folded and inserted into the included draw string travel pouch for travel or storage. Unfold the headphones completely before use until you feel the two earpieces 'snap' into place and remain in the open position.

There are 'L' and 'R' markings on the inside of the headband. Place the headphones on your head with the 'L' ear piece on your left side and the 'R' ear piece on your right side. When worn properly the headphone cable will be on your left side. The two ear cups may be adjusted up or down for most comfortable fit.

Connect the headphone plug to the headphone jack of your music player. Be sure that the plug is fully inserted into the jack. If the plug is not fully inserted you may only hear sound from one side of the headphones.

To protect your hearing always start listening with the volume control of your music player set to a low level and very gradually increase the volume to a comfortable listening level.

IMPORTANT! Listening at high volume for long periods of time can result in long-term hearing damage. For your safety, do not use headphones if they would prevent you from hearing warning sounds, such as while driving a car or motorcycle, riding a bike, etc. Remember that on-ear headphones such as the iB45 may reduce or entirely block outside noise, including warning sounds. Always be aware of your surroundings and do not use these headphones in situations that require you to hear warning sounds.
