Maintenance

- Place the unit on a level surface away from sources of direct sunlight or excessive heat.
- Protect your furniture when placing your unit on a natural wood and lacquered finish. A cloth or other protective material should be placed between it and the furniture.
- Clean your unit with soft cloth moistened only with mild soap and water. Stronger cleaning agents, such as detergents, thinner or similar materials can damage the surface of the unit.

A Consumer Guide to Product Safety

IMPORTANT SAFETY INSTRUCTIONS

When used in the directed manner this unit has been designed and manufactured to ensure your personal safety. If hand-held operation is required, run your electrical or electronic checks and the hazards. Please read all safety and operating instructions carefully before installation and use, and keep these instructions handy for future reference. Take special note of all warnings listed in these instructions on the unit.

1. Water and Moisture – The unit should not be used near water. For example: near a bathtub, washbasin, kitchen sink, laundry tub, in wet basements or near swimming pools and spa tubs. It should not be used in damp locations, such as near a sink or in a潮湿 room.

2. Ventilation – This unit should be situated so that its location or position does not interfere with its proper ventilation. For example, it should not be situated near or above a radiator, or in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.

3. Head – The unit should be situated away from heat sources such as radiators, heat registers, or other products (including amplifiers) that produce heat. The unit should be far away from sources of magnetic energy.

4. Power Supply

- Only connect the power cable in the type described by the unit’s power requirements.
- The unit is designed to operate on the voltage, frequency and phase supplied only by the type described on the unit’s power supply label. (120 Volt AC, 60 Hz is required)

5. Power-Supply Protection – Power supply cables should be routed so that they are not likely to be walked on or pinched by objects placed upon or against it. It is also best to have a clear path to the power outlet.

6. Cleaning

- The unit should not be used near water. For example: near a bathtub, washbasin, kitchen sink, laundry tub, in wet basements or near swimming pools and spa tubs. It should not be used in damp locations, such as near a sink or in a潮湿 room.

7. Objects and Liquid Entry – Care should be taken so that objects do not fall and liquids are not spilled into any openings or vents located on the product.

8. Attachments – Do not use attachments not recommended by the product manufacturer.

9. Lightning and Power Surge Protection

- Unplug the unit from the wall socket and disconnect the antenna or cable system during thunderstorms or when the unit is left unused for long periods of time. This will prevent damage to the unit due to lightning and power-line surges.

10. Overloading

- Do not overload wall sockets, extension cords, or integral convenience receptacles.

11. Service

- Do not attempt to service the product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

12. Periods of Nonuse

- If the unit is to be left unused for an extended period of time, such as a month or longer, the power cable should be unplugged from the unit to prevent damage or loss of power.

13. Servicing

- The user should not attempt to service the unit beyond those methods described in the user’s operating instructions. Service methods not covered in the operating instructions should be referred to qualified service personnel.

Limited 90-Day Warranty Information

iHome Products, a division of SDI Technologies, Inc. (hereafter referred to as SDI Technologies), warrants the product to be free from defects in workmanship and materials, under normal use and conditions, for a period of 90 days from the date of original purchase.

Should this product fail to function in a satisfactory manner, it is best to first return it to the store where it was originally purchased. Should the factory receive the radio and service it still be required, service may be performed by any dealer or installer carrying the iHome product line. In this case, the dealer or installer that performed the service will be responsible for all labor and parts charges for handling, packing, return/ship/insurance and repairs. This warranty is subject to verification of the defect as modification or deletion of the product to the radio Service Center listed below. The product must include proof of purchase, including date of purchase. The fee for service without proof of purchase is $50.00.

Before returning the product for service, please first replace the batteries (if applicable) with fresh ones, as exhausted or defective batteries are the most common cause of problems encountered.

If service is still required:

1. Remove the batteries if applicable and pack the unit in a well padded, heavy corrugated box.

2. Enclose a photocopy of your sales receipt, credit card statement, or other proof of the date of purchase, if within the warranty period.

3. Include a check or money order payable to SDI Technologies for the sum of $50.00 ($10.00 without proof of purchase). Your unit may only be returned to: Factory Service Center listed below.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This product is for use in the United States of America and is not designed or manufactured for use in any other areas in the world. Please check with your local government for any regulations that may serve as a limitation for this product.

This is a Class A digital apparatus. This apparatus complies with Canadian ICES-003.

This equipment complies with the limits for a Class B digital device as specified in Part 15 of FCC Rules. These limits provide reasonable protection against radio and TV interference in a residential area.

However, your equipment might cause TV or radio interference even when it is operating properly. To eliminate interference you may try one or more of the following corrective measures:

- Reorient or relocate the receiving antenna.
- Increase the distance between the equipment and the radio or TV.
- Use outlets on different electrical circuits for the equipment and the radio or TV.
- Consult your dealer or an experienced radio/television technician if the problem still exists.

Modifying or tampering with your system’s internal components can cause a malfunction and might invalidate the system’s warranty and void your FCC authorization to operate it. This Class B digital apparatus complies with Canadian ICES-003.
Maintenance

- Place the unit on a level surface away from sources of direct sunlight or excessive heat.
- Protect your furniture when placing the unit on a natural wood and lacquered finish. A cloth or other protective material should be placed between the unit and the furniture.
- Clean your unit with a soft cloth moistened only with mild soap and water. Stronger cleaning agents, such as benzene, thinner or similar materials can damage the surface of the unit.

A Consumer Guide to Product Safety

IMPORTANT SAFETY INSTRUCTIONS

When used in the directed manner this unit has been designed and manufactured to ensure your personal safety. However, improper use can result in potential electrical shock or fire hazards. Please adhere to all instructions outlined in this manual for future reference. Take special note of all warnings listed in these instructions and on the unit.

1. Water and Moisture
   - The unit should not be used near water. For example: near a bathtub, washbowl, kitchen sink, laundry area, swimming pool, or in a wet basement.
   - The unit should be situated so that its location or position does not interfere with its proper ventilation. For example, it should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or if it is built into a wall or cabinet, the ventilation opening for it should not be blocked or sealed.

2. Head – The unit should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.

3. Replace the batteries (if applicable) with fresh ones, as exhausted or leaky batteries can cause damage to the unit.

4. Do not open the receiver, as there is a danger of electric shock. Service only by qualified service personnel when the power supply cable is disconnected from the mains.

5. Objects and Liquid Entry – Care should be taken so that objects do not fall and liquids are not spilled into the product.

6. Attachments – Do not use attachments not recommended by the product manufacturer.

7. Lightning and Power Surge Protection – Untie the unit from the wall socket and disconnect the antenna or cable system during a lightning storm or when it is left unattended and unused for long periods of times. This will prevent damage to the product due to lightning and power-line surges.

8. Overloading – Do not overload wall sockets, extension cords, or integral convenience receptacles.

9. Servicing – The user should not attempt to service the unit beyond those methods described in the user’s operating instructions. Service methods not covered by the operating instructions should be referred to qualified personnel authorized by the manufacturer.

Limited 90-Day Warranty Information

iHome Products, a division of SDI Technologies Inc. (hereafter referred to as SDI Technologies), warrants this product to:

Warranty Period
- Protect your furniture when placing your unit on a natural wood and lacquered finish. A cloth or other protective material should be placed between it and the furniture.
- Clean your unit with a soft cloth moistened only with mild soap and water. Stronger cleaning agents, such as benzene, thinner or similar materials can damage the surface of the unit.

Water and Moisture
- The unit should not be used near water. For example: near a bathtub, washbowl, kitchen sink, laundry area, swimming pool, or in a wet basement.
- The unit should be situated so that its location or position does not interfere with its proper ventilation. For example, it should not be situated on a bed, sofa, rug, or similar surface that may block the ventilation openings; or if it is built into a wall or cabinet, the ventilation opening for it should not be blocked or sealed.

3. Heat – The unit should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.

4. Power Sources
- The unit should be connected to a power supply only of the type described in the operating instructions or as marked on the appliance.

Power-Cable Protection
- Power supply cables should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. It is always best to have a clear area from where the cable exits the unit to where it is plugged into an AC socket.

5. Objects and Liquid Entry
- Care should be taken so that objects do not fall and liquids are not spilled into the product.

6. Attachments
- Do not use attachments not recommended by the product manufacturer.

7. Lightning and Power Surge Protection
- Untie the unit from the wall socket and disconnect the antenna or cable system during a lightning storm or when it is left unattended and unused for long periods of times. This will prevent damage to the product due to lightning and power-line surges.

8. Overloading
- Do not overload wall sockets, extension cords, or integral convenience receptacles.

9. Servicing
- The user should not attempt to service the unit beyond those methods described in the user’s operating instructions. Service methods not covered by the operating instructions should be referred to qualified personnel authorized by the manufacturer.

Disclaimer of Warranty

NOTE: The warranty is valid only if the product is used for the purpose for which it was designed. It does not cover (i) products which have been damaged by negligence or willful actions, misuse or accident, or which have been modified or tampered with; (ii) products for which repairs are requested during the warranty period; (iii) the cost of repairing, replacing, or returning the product; (iv) the cost of shipping this product to the Factory Service Center and its return to the owner.

This warranty is valid only in the United States of America and does not extend to owners of the product other than to the original purchaser. In no event will SDI Technologies or any of its affiliates, contractors, resellers, or directors, shareholders, officers, directors, members or agents be liable to you or any third party for any consequential or indirect damages, any lost profits, sales revenues or business profits of any kind, or for any other special, incidental or punitive damages of any kind, including, but not limited to, lost data or lost profits, which may arise from the use or inability to use the program.

Using the iHM77

A magnetic base holds the iHM77 together for travel or storage. To separate the two speakers, gently pull them apart. To unlock and expand each speaker, grip the top and bottom and give a small twist counter-clockwise. DO NOT pull hard once open, as the built in spring will automatically extend the speaker to its proper position. To compress and lock speaker, line up lock tab on speaker top with lock/unlock arrow on base. Press speaker down from the top and twist clockwise to lock in place.

• Connect a mini-USB plug to the input jack on each speaker.
• Connect the stereo 3.5mm audio plug to the headphone jack or line-out of any audio device.
• Slide the Power Switch of each speaker to the ON position. The blue power light will come on.
• Press play on your audio device and adjust its volume to listen to audio.

Note: the larger USB plug is used for charging only, not for audio. Please refer to next section for charging instructions.

Connecting the iHM77

• Connect a mini-USB plug to the input jack on each speaker.
• Connect the stereo 3.5mm audio plug to the headphone jack or line-out of any audio device.
• Slide the Power Switch of each speaker to the ON position. The blue power light will come on.
• Press play on your audio device and adjust its volume to listen to audio.

Note: the larger USB plug is used for charging only, not for audio. Please refer to next section for charging instructions.

Charging the iHM77

The iHM77 is powered by a rechargeable battery in each speaker. When the blue power light dims, or if you start to notice sound distortion at higher volumes, it’s time to recharge the batteries.
• Connect the larger USB plug to a powered USB port, such as that on a computer. The light on the speaker will turn to red while charging and turn blue when fully charged.

Note: you can continue to listen to the speakers while they are charging.

NOTE: This product has magnets in the base of each speaker. To avoid interference or possible damage, do not place speakers directly on electronic devices such as computers or monitors.
Maintenance

1. **Water and Moisture** – The unit should not be used near water. For example: near a bathtub, washbowl, kitchen sink, laundry tub, swimming pool or in a wet basement.

2. **Ventilation** – The unit should be situated so that its location or position does not interfere with its proper ventilation. For example, it should not be situated on a bed, sofa, rug or similar surface that may block the ventilation openings; it should not be situated in a built-in installation, such as a bookcase or cabinet that may impede the flow of air through the ventilation openings.

3. **Heat** – The unit should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

4. **Power-Cable Protection** – Power supply cables should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. It is also wise to have a fuse or circuit breaker in the power outlet which controls the product.

5. **Cleaning** – The unit should be cleaned only as recommended. See the Maintenance section of the user’s operating instructions.

6. **Objects and Liquid Entry** – Care should be taken so that objects do not fall and liquids are not spilled into any openings or vents located on the product.

7. **Attachments** – Do not use attachments not recommended by the product manufacturer.

8. **Lightning and Power Surge Protection** – Unplug the unit from the wall socket and disconnect the antenna or cable system during a lightning storm or when it is left unattended and unused for long periods of time. This will prevent damage to the product due to lightning and power-line surges.

10. **Overloading** – Do not overload wall sockets, extension cords, or integral convenience receptacles as this might cause a risk of fire or electric shock.

11. **Service** – Service by qualified service personnel only. Service is required when the unit has been damaged in any way: power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the unit, the unit has been exposed to rain or moisture, does not operate normally, or has been dropped.

Limited 90-Day Warranty Information

Home Products, a division of SDI Technologies (hereafter referred to as SDI Technologies, warrants the product to be free from defects in workmanship and materials, under normal use and conditions, for a period of 90 days from the date of original purchase.

Should the product fail to function in a satisfactory manner, it is best to return it to the store where it was originally purchased. Should this not resolve the problem, the unit should be returned to the Factory Service Center listed below. The product must include proof of purchase, including date of purchase. The fee for service without proof of purchase is $20.00.

Before returning this product for service, please first replace the batteries (if applicable) with fresh ones, as exhausted or defective batteries are the most common cause of problems encountered.

1. Remove the batteries if applicable and pack the unit in a well padded, heavy corrugated box.

2. Enclose a photocopy of your sales receipt, credit card statement, or other proof of the date of purchase, if within the warranty period.

3. Send the unit prepaid and insured to the Factory Service Center listed below.
